Software Engineering Internship:

Applied Software Engineering student with skills in leadership, planning, communication studies, technical writing, and database management; seeking an internship, either remote or on-site, to learn more about the software development process in Northern Kentucky; Cincinnati, Ohio; and the Cincinnati Tri-State area.

Skills:

HTML/CSS/PHP	NodeJS	Conflict Management	Leadership/Mentorship
JavaScript/jQuery	Database Management	Public Speaking	Team Collaboration
Python/Python Flask	Business Development	Creative Problem Solving	Time Management

Education

Bachelor of Science: Applied Software Engineering (May 2026)
Minors: Communication and Computer Science
Northern Kentucky University, Highland Heights, KY GPA: 3.9/4.0

Associate Degree of Arts: Integrative Studies (May 2022)
Northern Kentucky University, Highland Heights, KY GPA: 4.0/4.0

Projects

- Options, Please – 1st Place Fidelity Hackathon Winner | Built in under 24 hours with PhaserJS and ReactJS (September 2025)
- Collaborated with a team to design and build a browser-based options trading simulation game in under 24 hours using Phaser.JS and ReactJS
 - Developed narrative driven situations for players to work through and deduce the correct choice of option given the situation.
 - Won 1st place at the Fidelity sponsored hackathon, demonstrating strong teamwork, rapid prototyping, and creative problem-solving
 - Learned Phaser.JS and ReactJS for the first time during the hackathon and applied them to create an award winning MVP.
- Chat220 – Multi-Modal Chat Platform using NodeJS, MongoDB, JavaScript, and REST APIs (April 2025)
- Built and deployed the index page that integrates MongoDB-backed APIs to power search results, while designing a responsive layout for user engagement.
 - Implemented pagination to organize and simplify public posts and search results.
 - Crafted the index page layout using Bootstrap and jQuery frameworks.
 - Optimized page performance by asynchronously fetching MongoDB API results during initial index load, reducing perceived load times and improving user experience.
 - Developed functionality for posting LLM-based conversations, improving knowledge sharing and minimizing repetitive user queries.
- GrooveNest – Music Blog Page Implemented using HTML, Bootstrap, PHP, and MySQL (December 2024)
- Developed a blog website using PHP and Bootstrap, dynamically displaying blog posts using a MySQL database.
 - Implemented an index page that lists blog posts with clickable titles linking to individual post details.
 - Integrated user authentication and role-based access control, allowing admins to manage all posts and users to manage their own posts.
 - Utilized Git for version control, managing project updates and collaborating on code efficiently with a team.

Work Experience

- Antonio’s Pizza Pub, Northern Kentucky
Kitchen Manager, (April 2024—Present)
- Managed staff schedules to ensure efficient kitchen operations.
 - Acted as a primary point of contact for addressing kitchen-related issues.
 - Monitored inventory and managed stock to avoid shortages.
 - Oversaw production of fresh dough and sauce as needed.
 - Trained kitchen staff on food preparation, safety protocols, and proper use of equipment.
